- AVAILABLE IN CAT5, CAT6 AND CAT6A VERSIONS

OVERVIEW

This range of stylish Tool Free Jacks from Brand-Rex are available for the 10GPlus, Cat6Plus and GigaPlus ranges. Used within a channel the Tool Free jacks provide an industry leading electrical performance. These jacks are designed for QUICK, EASY and EFFICIENT termination. The low insertion force termination means that no special tooling is required and there is no need to terminate on a flat surface.

Tests have proved that this type of jack can be terminated in half the time of a standard type jack, reducing installation labour time and cost. The product comes supplied in boxes of 12 with instructions for terminating the jacks. Each has integral colour coded wiring labels, and has a colour coded carrier to differentiate the type of product.

To enhance the usability of this product Brand-Rex have introduced two new modular panels, inline and angled 24-way versions, making these ideal for data centre applications.
