

## WIREXPERT CABLING CERTIFIER

### KEY FEATURES

- Cat3 to 7A / Class C,D,E,EA,F and FA copper cabling certification
- Multimode and single mode fibre certification for length and loss
- Dual control system (DCS) allows testing from either end
- Optimised for testing efficiency on-site

### OVERVIEW

Providing the fastest Category 7a cable and fibre certification on the market, the WireXpert from Psiber Data is designed to meet all present and future cabling standards, including the proposed 40G Ethernet networks.

The WireXpert extends testing capabilities and ensures that cable and network installers gain maximum productivity through the industry leading DCS dual control system, which allows installers to control the tester and view results from either end.

The tester is optimised for testing efficiency: industry leading measurement speed boosts the test throughput. New fibre SmartProbes cut the test times of optical links by eliminating the need to swap fibres for dual wavelength testing and calibration.

The WireXpert can test Cat3 to 7A copper and multimode and single mode fibre links. It is easy to use having a vendor managed cable database, pre-defined settings and a full workday of battery life.

Automatic detection of remote connection improves operator efficiency, the unit will support autotest and continuous test modes and the talkset means easy communication between operators. Results can be exported into PDF and XML formats and the ReportXpert software is included in the package.
